Invest early: End up with more

The early investor who saves \$5,000 a year starting at age 25 could end up with more than \$825,000 when they're 65, while the late investor who saves \$5,000 a year starting at age 50 would have about \$128,000.

What would you do with an extra \$697,000 if you started investing early?
